

NEW COOL COMPACT WINE STORAGE FROM DANBY

Retailers looking for products to capitalise on the promise of a long hot Summer can now offer the new Danby 16 bottle wine cooler. This bijou cabinet is the first of a comprehensive range of wine-cooling units coming on stream and available from distribution partner [Exertis](#).

Ideal for extra storage space, or for entertaining in the garden, Danby's new compact wine cooler will hold 16 bottles and the temperature can be set between 6-14°C. It has two sloping shelves and two fixed shelves, so stacking is easy. Smoked UV resistant glass protects wine from the effects of sunlight and an energy efficient blue LED lighting gives a clear view of the contents.

Measuring a compact 52cm high x 44.5 wide x 50.5 wide, the cooler takes up very little space and is perfect for a garden summer house where there is mains power. It is A+ rated.

John Welbourn, who is heading up Danby sales for the UK and mainland Europe says "This is a great value product, feature rich and low cost to run. This is a Danby-produced cooling that not only provides retailers with a strategic range for consumers who need a second appliance but a perfect product for garden rooms, outside catering points and BBQ kitchens."
