

QUICK-START GUIDE:

DANBY SMART HOME APP FOR YOUR DANBY SMART APPLIANCE

1 INSTALL APP

Download the 'Danby Smart Home' app to your smart mobile device from either:

- Apple App Store
- Android Google Play

2 USER REGISTRATION AND NETWORK CONFIGURATION

A. Launch the Danby Smart Home app and register an account. Registration can either be by email or mobile #

B. Connect the power to your device without turning on the device.

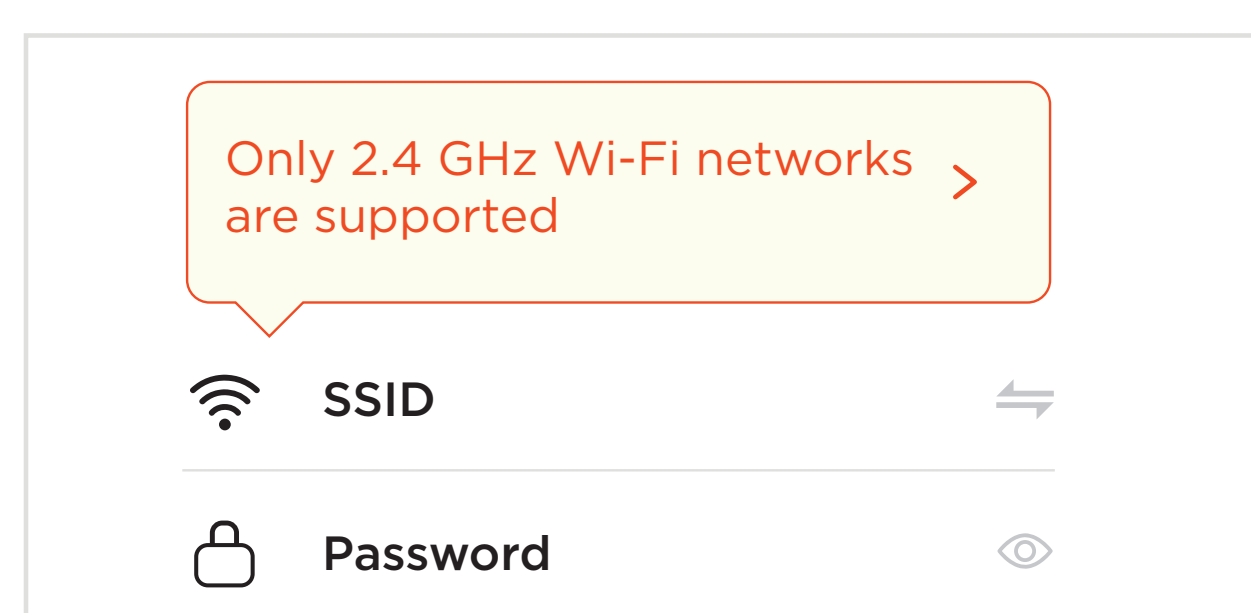

C. Press the 'Fan' button six times. The unit will display rapidly flashing "AP".

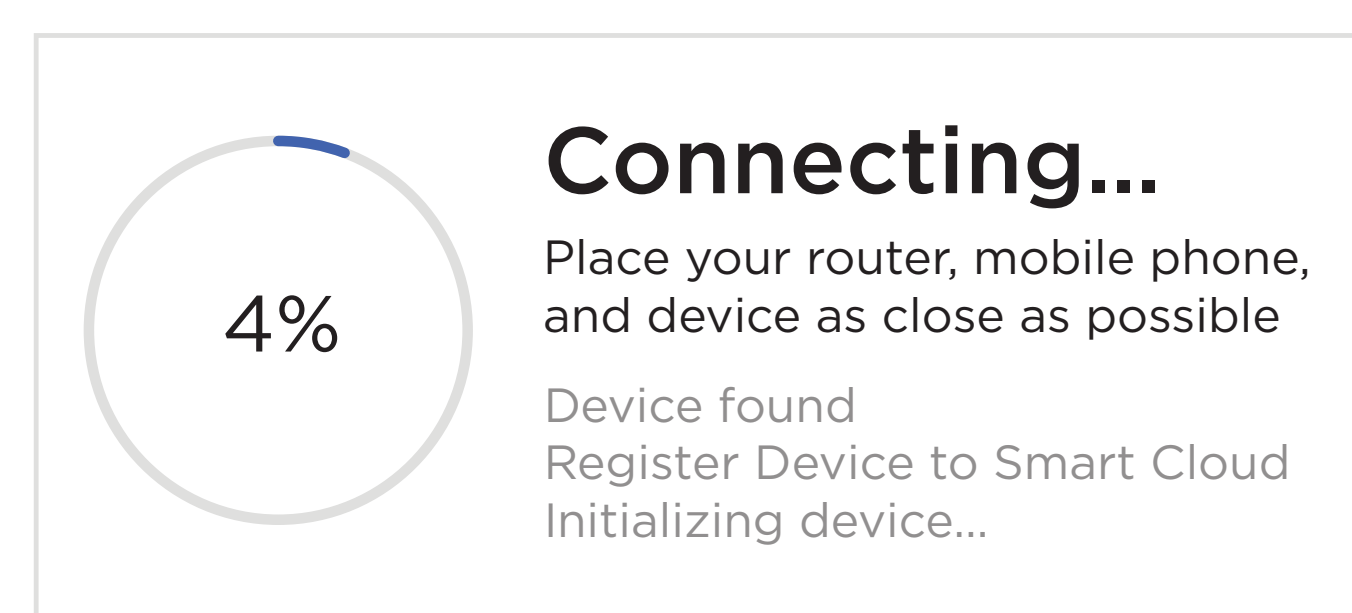

D. Open the app and "Add Device"

E. Choose your appliance type.

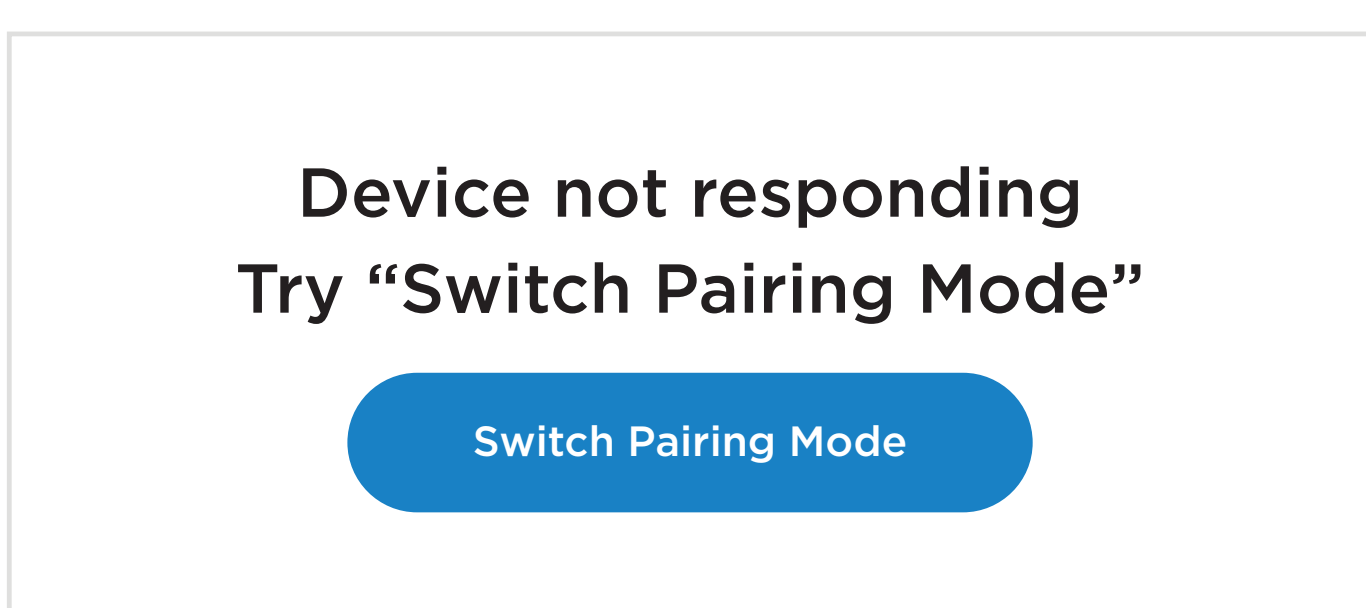

F. A 2.4 GHz Wi-Fi network is required to complete the setup. Enter SSID information and password and click 'Confirm'.

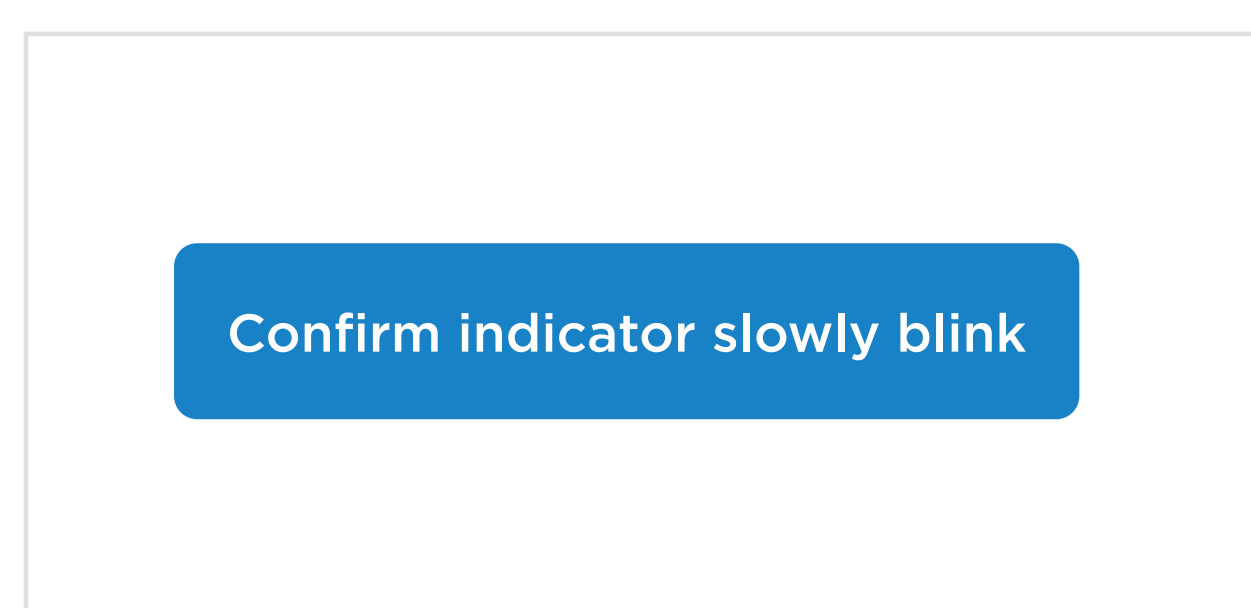

G. The APP software automatically matches the device and the home network. Installation takes around 60 to 90 seconds to complete

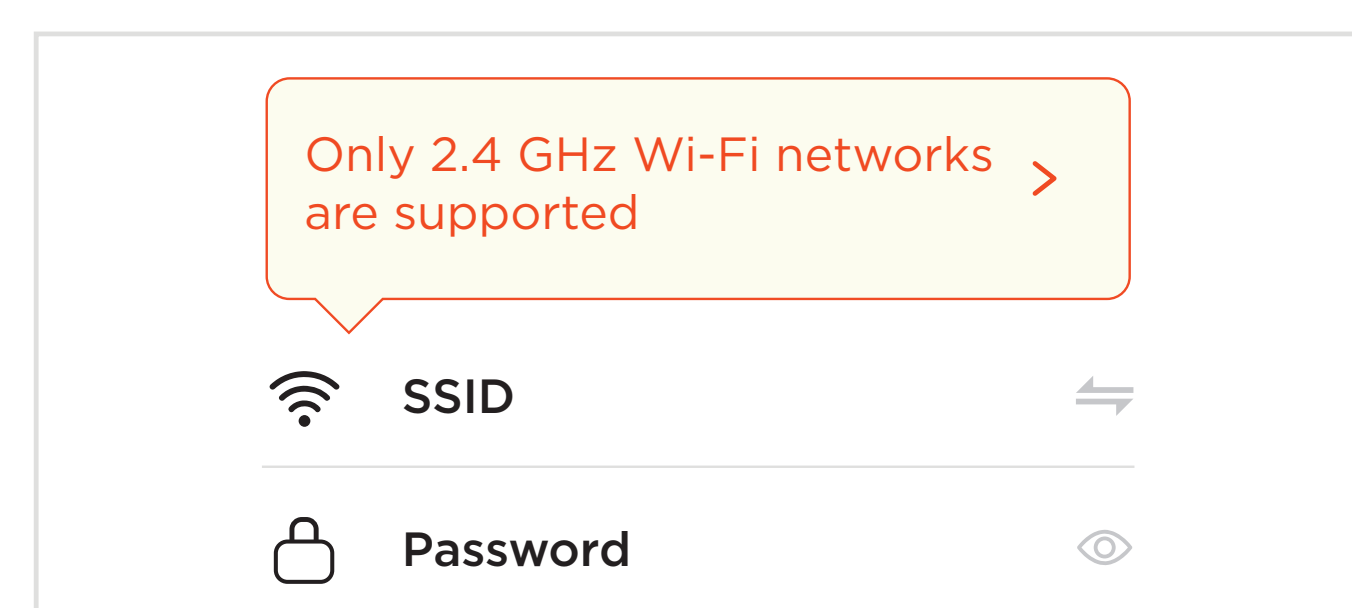

H. Installation Complete. You can rename the device to a name of your choosing.

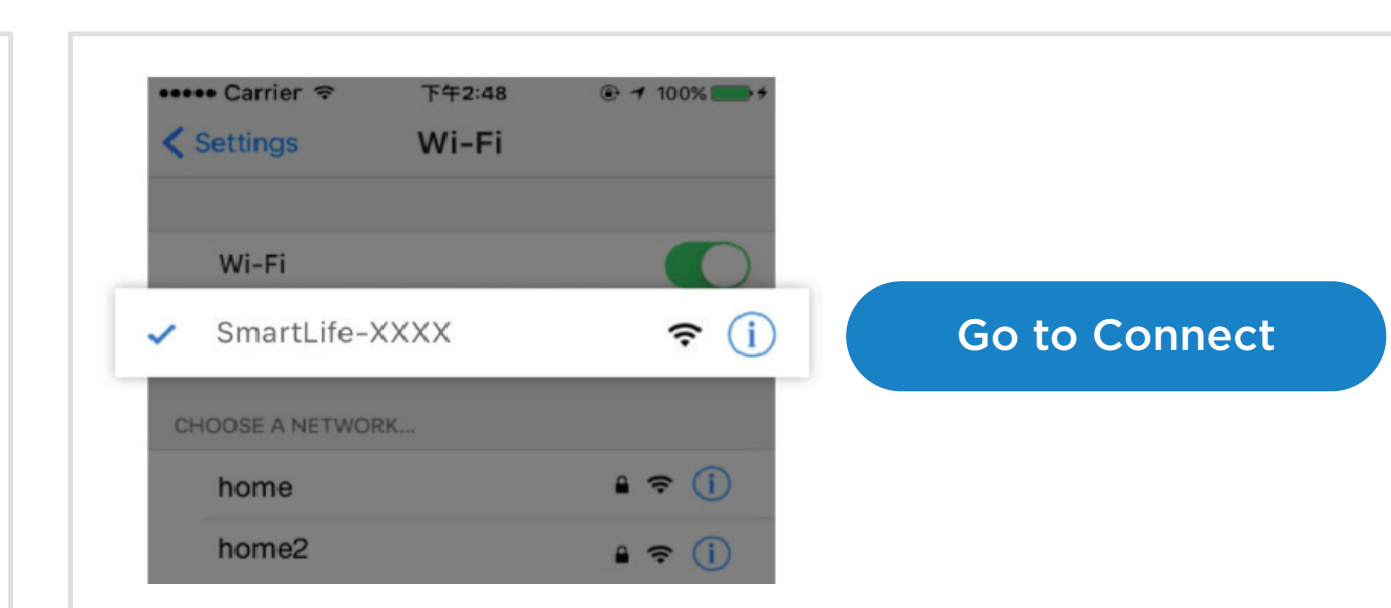

I. In some instances, the previous configuration process might fail. If all 3 requirements above are met and you still can't connect, follow to the 'Switch Pairing Mode' instruction.

J. Confirm that the unit is displaying 'AP' and move to the next phase.

K. A 2.4 GHz Wi-Fi network is required to complete the setup. Enter SSID information and password and click 'Confirm'.

L. In phone settings, go to Wi-Fi settings and select the AC device name 'SmartLife-xxxx'.

Following this step, please refer to step G and H.
